INDEX TO VOL. VI.

GEOMETRY OF TWO DIMENSIONS.

Page

On the intersections of two conics. By *J. J. Sylvester* . 18

On the construction of the ninth point of intersection of two curves of the third degree, when the other eight points are given. By *Thomas Weddle* 83

On the mode of using the signs + and − in Plane Geometry. By *Professor De Morgan* 156

On the connexion of involute and evolute in space. By *Professor De Morgan* 267

Construction by the ruler alone to determine the ninth point of intersection of two curves of the third degree. By *A. S. Hart* 181

GEOMETRY OF THREE DIMENSIONS.

On certain "loci" connected with the geodesic lines of surfaces of the second order. By *John Y. Rutledge* . . 21

On the theorems in space analogous to those of Pascal and Brianchon in a plane. Part III. By *Thomas Weddle* . . 114

On certain geometrical theorems 160

On duplicate surfaces of the second order. By *John Y. Rutledge* 201

Solutions of some elementary problems in geometry of three dimensions. By *W. Walton* 287

ALGEBRA AND TRIGONOMETRY.

On certain general properties of homogeneous functions. By *J. J. Sylvester* 1

Two arithmetical theorems. By *Henry Wilbraham* . 32

Application of combinations to the explanation of Arbogast's method. By *Professor De Morgan* 35

Demonstration of the known theorem, that the arithmetic mean between any number of positive quantities is greater than their geometric mean. By *A. Thacker* . . . 81

On the theory of linear transformations. By *George Boole.* . 87

On the reduction of the general equation of the n^{th} degree. By *George Boole* 106

On Arbogast's method of derivations. By *W. F. Donkin* . 141

Reply to Professor Boole's observations on a theorem contained in the last November number of the *Journal.* By *J. J. Sylvester* 171

ALGEBRA AND TRIGONOMETRY—*Continued.*

Page
On the method of vanishing groups. By *James Cockle* . 174
Note on Mr. Cockle's solution of a cubic equation. By *A. Cayley* 186
Sketch of a memoir on elimination, transformation, and canonical forms. By *J. J. Sylvester* . . . . *ib.*
Letter to the Editor. By *George Boole* . . 284
Proposed question in the theory of probabilities. By *George Boole* 286
On the general theory of associated algebraical forms. By *J. J. Sylvester* 289

DIFFERENTIAL AND INTEGRAL CALCULUS.

Notes on Lagrange's theorems. By *Arthur Cayley* . 37
On a doubly infinite series. By *Arthur Cayley* . . 45
A demonstration of Taylor's theorem. By *Homersham Cox* 80
On certain definite integrals. By *Arthur Cayley* . 136
On the index symbol of homogeneous functions. By *R. Carmichael* 277

MECHANICS.

On the laws of the elasticity of solid bodies. By *W. J. Macquorn Rankine* 47, 178, 185
On a mechanical experiment connected with the rotation of the earth. By *Henry Wilbraham* . . . 274

HYDROSTATICS AND HYDRODYNAMICS.

On Marriotte's law of fluid elasticity. By *Henry Wilbraham* . 167
On Clairaut's theorem. By *Samuel Haughton* . . 182
On the velocity of sound in liquid and solid bodies of limited dimensions, especially along prismatic masses of liquid. By *W. J. Macquorn Rankine* 238

HEAT.

On the conduction of heat in crystals. By *G. G. Stokes* . 215

MISCELLANEOUS.

Mathematical Notes 80, 81, 181, 182, 185, 186, 201, 284, 286, 287, 289

Notes and other passages enclosed in brackets [ ], are insertions made by the Editor.

The date of actual publication of any article, or portion of an article, may be found by referring to the first page of the sheet in which it is contained.—ED.
